

WE LISTEN. WE OBSERVE. WE OPTIMIZE.

11" DIAMETER RANDOM ORBITAL SANDER

DYNABRADE NITRO SERIES™

NEW

MODEL NS11 Non-Vacuum

MODEL NS11V Vacuum (1-1/4" Vac Port)

The Dynabrade Nitro Series™ 11" Diameter Random Orbital Sander will give the user the professional results they desire. This powerful tool with proportionate 3/4" diameter orbit assures a swirl-free finish on a variety of surfaces. Additionally, it is perfect to quickly remove surface imperfections on large areas.

FEATURES AND BENEFITS

- Powerful 1 hp, 2,800 RPM motor offers high torque and power, 43% higher hp than previous model.
- The sander weight/balance allows the operator to let the tool do the work on large horizontal surfaces.
- Soft grip insulated handle reduces cold air transmission to the operator.
- Side handle can be positioned for right or left-handed operation.
- Rear exhaust designed to move air away from the operator.
- Safety-lock lever throttle for ease of operation.
- Models include weight-mated hook-face sanding pad to further reduce vibration and allow quick abrasive changes.
- Right angle gears lubricated by unique wick system allowing up to eight hours of continuous use.

IDEAL APPLICATIONS

- Sanding large flat surfaces of corian, wood, composites, fiberglass, metal and plastic.
